2021 COLLINE NOVARESI BIANCO, MARIAPIA

PRODUCER OVERVIEW

Davide Carlone's organic 11 hectares (and growing) mostly face south/southwest at 380-450 meters on the volcanic remnants of the Valsesia Supervolcano with an Alpine influenced continental climate. The production is mostly from young and middle-aged vines. Nebbiolo is the focus with a supporting cast of Croatina, Vespolina, and Erbaluce. His Boca DOC wines are traditionally made in larger oak botti and all the single varietal wines are aged exclusively in steel.
