

THE SOURCE ETNA BARRUS SICILY

2020 ETNA ROSSO

PRODUCER OVERVIEW

The dream project of three friends, Etna Barrus has 2.7 vineyard hectares planted in 2005 below one of Mount Etna's extinct cones, Monte Gorna. At 600m altitude with a southeast exposure with an open view of Ionian Sea, their organic massale selections (organic since the beginning, but certification started in 2021) of Nerello Mascalese (90%) and Nerello Cappuccio (10%) grow on sandy volcanic soils rich in organic substances.

VINEYARD DETAILS

Etna Barrus Purple is harvested from two parcels of 90% Nerello Mascalese and 10% Nerello Cappuccio planted to massale selections in 2005 on southeast-facing slopes at 550-600m on volcanic bedrock and sandy volcanic topsoil.

CELLAR NOTES

Etna Barrus Purple is naturally fermented in steel with destemmed grapes for one week and aged in steel for one year.
