

# THE SOURCE ETNA BARRUS SICILY

## 2020 ETNA ROSSO, SELEZIONE

### PRODUCER OVERVIEW

The dream project of three friends, Etna Barrus has 2.7 vineyard hectares planted in 2005 below one of Mount Etna's extinct cones, Monte Gorna. At 600m altitude with a southeast exposure with an open view of Ionian Sea, their organic massale selections (organic since the beginning, but certification started in 2021) of Nerello Mascalese (90%) and Nerello Cappuccio (10%) grow on sandy volcanic soils rich in organic substances.

### VINEYARD DETAILS

Etna Barrus Orange is harvested from two parcels of 90% Nerello Mascalese and 10% Nerello Cappuccio planted in 2005 on east-facing slopes at 550-600m on volcanic bedrock and sandy volcanic topsoil.

### CELLAR NOTES

Etna Barrus Orange is naturally fermented in steel with destemmed grapes for one week and aged in old, 225-500L French oak for 12-18 months.
