2022 GRÜNER VELTLINER KREMSTAL FURTH

PRODUCER OVERVIEW

Ninth-generation winegrower, Michael Malat took the lead from his father, Gerald, at their Kremstal winery that dates to 1722. Kremstal is a climatic tug-of-war between eastern Pannonian warm winds and cold northern and western winds, and home to diverse soils on large terraces, from loess (wind-blown calcareous fine sands), gravels and various formations of limestone, mica-schist and granulite.

VINEYARD DETAILS

Vineyards for the Grüner Veltliner “Furth” are on the Danube’s right bank. Planted between the 1970s and 2010s (20 years average), the vines face northwest at 210-230m on large, gently sloped terraces. The bedrock and topsoil are composed of loess, sand, and gravel.

CELLAR NOTES

Hand harvested and naturally fermentation and aged in steel.
