MARTIN MUTHENTHALER

WACHAU

RIESLING RIED BRUCK

PRODUCER OVERVIEW

A former truck driver who seemingly explains with pride that he was fired from his job (likely for wanting to do everything with greater precision!), Martin Muthenthaler returned home to his family's vineyards in the Spitzer Graben of the Wachau, the coldest section on the north side (left bank) of the Danube (Donau) River. Once a former pathway of the Danube before tectonic movements altered the course of the river, this steep, east-to-west running valley splits off from the Danube at the far western end of the Wachau where it turns north about 4 km in. Here, Martin farms organically, almost everything of the work himself, at least until the arrival of his Bavarian wife, Melanie, who in 2021 began helping with the vineyard and administration. Without the assistance of outside consultants in the cellar but drawing on many years of exchange and collaboration with his great friend and neighbor, the Wachau luminary Peter Veyder-Malberg, this garagiste renaissance man with a talented green thumb and palate crafts Rieslings and Grüner Veltliners of sterling precision and quality, which have few equals in all of Austria.

VINEYARD DETAILS

Riesling Ried Bruck was planted in 1990-2005 in the Wachau's Spitzer Graben where it sits at 350-420 m of altitude on extremely steep terraces with south/southwest exposure. The thin sandy and rocky topsoil is derived from the underlying mica schist bedrock.

CELLAR NOTES

Riesling Ried Bruck grapes are macerated up 8 hours, depending on the ripeness (with riper grapes receiving less time), pressed over an 8-hour cycle, tank settled for 12 hours, and then undergo spontaneous natural fermentation with maximum temperatures of 18-22°C maximum and continued aging in 700-1000 L steel vats for 10 months. Malolactic rarely happens but is not inhibited, and the first sulfites are added a month after fermentation. The wine is lightly filtered before bottling.
